KOBELT UNLEASHES THE MIGHTY MARINER

World renowned marine controls designer and producer Kobelt Manufacturing has just launched the definitive electronic controls system. From the same company offering the best warranty on controls and steering, comes a product brilliant in its simplicity to meet the demands of boatowners everywhere,

Priced to meet or beat mid-tier products, The *Mighty Mariner's* exceptional quality is highly affordable to those who wish to purchase a superior marine control system once, and run it forever. Its excellent craftsmanship and ease of use are championed by the design and product-testing leadership which are synonymous with the Kobelt brand.

The *Mighty Mariner* is incredibly safe and easy to operate. Featuring manual override, the system allows you to take charge of your vessel, even if the electricity fails.

Water-proof, CE approved, and composed entirely of die-cast bronze and stainless steel, the *Mighty Mariner* contains no plastic or low grade metal, making it resistant to hot sun and water year after year. And, reflecting Kobelt's commitment to all its marine components, this electronics system is backed by the best warranty in the business.

True to its name, the *Mighty Mariner* is a complete control system designed for any size vessel utilizing mechanically operated engines and gearboxes. A streamlined system requiring only control heads and actuators, it's simplified with no separate microprocessor box. The controls communicate directly with the actuator, and are wired in series, minimizing excess wiring and wiring time.

The *Mighty Mariner* is compact and easy to mount, requiring only 4" of depth on your dash. It is available in a side-mount model, or the amazing portable *walk-about*.

Standard features include: Station select, Station LOCK, and Throttle Override (for engine warm-up in neutral). Engine Synchronization (for twin engines) is just one of the flexible solutions offered by Kobelt to fit your custom requirements. Finishes include: chrome, black, polished brass, and white.
