

MODEL 2019 STACKABLE FLUSH MOUNT CONTROL HEAD

The model 2019, like all other Kobelt controls, is totally constructed in bronze and stainless steel.

Ease of installation and maintenance as well as adjustable detent and frictions make this control head an outstanding product in the market.

The Model 2019 does not provide single lever multi-function control. Only ONE function can be accomplished per lever.

The levers can be combined to suit customer requirement and an almost unlimited variety of control functions can be accomplished.

Because of the quality manufacture and engineering, we can again offer our five-year limited warranty on this product.
