

7165L JOYSTICK

Putting You In Control.

The Kobelt 7165L joystick is a single axis input device that can be configured for discrete or analog output. This allows for simple use as a jog unit, capable of control in two directions, or as an infinitely variable positioning device. Its small size allows for installation in tight areas where space constraints are paramount.

Manufactured from die cast bronze and stainless steel, the 7165L is designed for indoor and outdoor installation. The joystick is protected with a UV and water-resistant rubber boot that prevents ingress into the electronic components.

Key Features

- Bronze and stainless steel construction
- Durable rubber boot seal on joystick handle
- Configurable controller outputs and handle behavior

Specifications

OUTPUT

- Potentiometer:
- Range:
- Max Power:
- Connection:

Potentiometer

1k Ω or 5k Ω
18% - 82%
1W
80 in [2m] lead
18 AWG [0.75 mm²]

OUTPUT

- Switch Contacts:
- Maximum Voltage:
- Maximum Current:
- Connection:

Discrete

Form C, N.O or N.C
One per direction
250 VAC
10A
80 in [2m] lead
18 AWG [0.75 mm²]

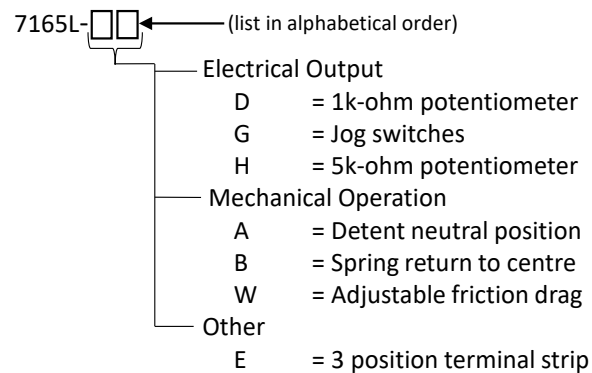

- Handle travel: 24° (per direction)
- Return spring operating force: 1 lb·f [4.5N]
- Finish: Polyester powder coat, textured black
- Operating Temperature: -13°F ... 158°F [-25°C ... 70°C]
- Weight: 1.0 lbs [0.45kg]
